

How to update file RIGHT

1. Connect with USB stick to PC, and click mouse right button, choose FAT32 to format.
---this step make sure USB stick at standard condition (we recommend USB2.0 above 2GB)

2. Download the files into USB stick and extract all the files to USB stick root directory. All of them, include the folder
---this step make sure all files include file folder at USB stick main folder
Those 2 steps no need car, and no matter black NAVI screen or not, first 2 steps are SAME

3. Start the car, connect the USB stick with CarPlay USB cable.

1. click "OK" option

2. click "OK" option. Please note screen will goes to black

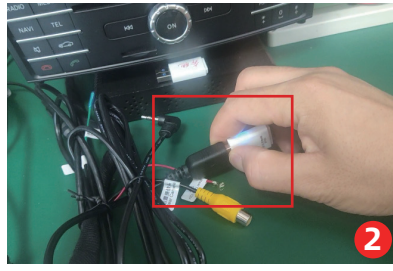

3. wait for few seconds, screen turn on again automatically and shows messages like photo

4. click "OK" option

5. IMPORTANT: remove USB stick FIRST then click "ok" option

6. System will restart again. After that, please check whether updating success--setting--system version
